

LINK 175

When it comes to your drainage plow needs, **Link plows from Mid America Trenchers are rugged enough to get through any soil type, making your job easier.**

DOUBLE LINK DESIGN

The double link design is the most popular commercial drainage plow and for good reason: certified to maintain grade and built to the most exacting standards, the Link 175 is accurate in the most demanding conditions.

UNSURPASSED FLEXIBILITY

With an installation range from 3" to 12" and a wide variety of options for tile feeding systems, grade-control mounting, and accessories, the Link 175 is the industry's most versatile unit.

USE YOUR OWN POWER UNIT

Link plows can be mounted on a variety of rubber tired and rubber tracked tractors and steel tracked bulldozers. The Link 175 is designed for power units from 55K through 75K lbs.

COMMERCIAL-GRADE INSTALLATION

Built to exacting standards, the Link 175 is the same on the back of the Link 430 DL self-contained unit or the power unit you supply.

Mid America Trenchers is committed to meeting your trenching installation needs. From commercial contractors working in the utility, communication, gas, wind, or oil industries to agricultural contractors installing drainage tile, our team is here to provide you with the best equipment, service, and expertise possible.
